# What's New in 6Sigma DCX 11

**future facilities**

We're continually evolving our toolsets to keep our users innovating. In Release 11, we've focused our improvements on four key areas:

## 1 New Product

- Meet 6SigmaAccess - our new, browser-based IT planning and provisioning web app, connecting IT operations directly with 6SigmaFM

### Benefits

Let multiple users view and make change requests to service your 6SigmaFM rooms on the move - on mobile, tablet and PC.
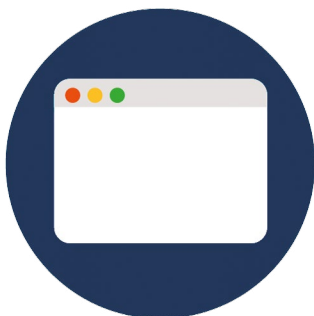

## 2 Performance

- 2x increase in solver speed
- In-built, seamless integration with cloud solving on rescale.com
- New black box cabinets

### Benefits

Get model results faster than ever, and access Rescale's unlimited, flexible and scalable compute resource direct from 6SigmaDCX.

## 3 Usability

- Improved cable, pipe and duct sketching and editing, plus new branch buttons
- New, clearer object manipulators and hover-over cursor icons

### Benefits

Draw routes faster and easier than ever, and quickly identify when manipulators can be selected.

## 4 Connectivity

- Integration with The Green Grid's Performance Indicator tool
- Cormant-CS added to our wide range of DCIM tool integrations

### Benefits

Use TGG PI to visualize your facility's performance, and import data from Cormant-CS directly into your DCX models.
